

 **Spark**  
SILVER JEWELRY

We started our business activity in 1989 in Poland as a lapidary workshop. The experience of working with gemstones led to our great appreciation of precision cutting. No wonder then, that we were absolutely mesmerised upon our first encounter with Swarovski® crystals, which are widely known for their natural beauty and admired for scintillating brilliance.

It is the acknowledgement of this unequalled shine and high precision cutting that resulted in premiere of the brand Spark in 2003. The launching of the brand was inspired by Swarovski® crystals, which have been a source of creativity

for us ever since. The myriad of colours, effects, shapes and sizes they come in, offer endless possibilities of combinations and constantly stimulate our designers' imagination.

These are not the crystals that are chosen to match a certain design, though – the crystals lie at the core of each piece of our jewellery and the whole creation process resolves around them. Our designers' role is simply to capture their beauty and express their uniqueness by combining them with other elements – silver as well as noble and elegant Alcantara®, which constitute an adequate setting for such extraordinary stones.

Swarovski® crystals can be recognized by the 'Crystals from Swarovski' Seal, which serves as a certificate of authenticity.
